Lecture/Lab Split

Please pick one concept presented in chapter 6 (pages 224 - 232). Summarize the main idea of the concept in your own words. Tell us why it is important and interesting to you, and what is one thing that is still unclear to you.

What are the differences between

the normalization process presented in class and the presentation in the book (pages 205 - 213)? Can you provide an example of a table that is in 1NF and not in 2NF? What will be the table(s) in 2NF, 3NF? How about one in 2NF and not in 3NF? What will be the table(s) in 3NF?

## Lesson 06

Starts Oct 10, 2019

12:00 AM
